SUMMARY

Graduated from Alterra Academy with expertise in manual and automation testing across web, mobile, and API platforms. Proficient in Java, SerenityBDD, Cucumber, Maven, Rest Assured, and Gherkin, with hands-on experience using Postman for API testing and JMeter for performance testing.

Currently working as a QA Engineer with 2 years of professional experience, delivering high-quality testing through strong attention to detail, a proactive approach, and adaptability to new tools and methodologies. Passionate about ensuring product quality and optimizing testing efficiency.

TECHNICAL SKILLS

- Languages: Java
- Technologies: Selenium, Serenity BDD, Rest Assured, Cucumber, Postman, Appium, JMeter.
- Other: Troubleshooting & Problem Solving.

PROJECTS

- **Alterra Academy Capstone Project** : Perform Website and API testing for cookit in a group of 2 persons. Both of group members are involved for each website and API testing. For website testing we perform manual and automation testing and create a total of 63 test scenarios, and 100% Coverage of test scenarios for both manual and automation testing and 100% of total test scenarios are executed successfully. See the source code for website automation testing on [Github](#). For API testing we perform manual and automation testing and create a total of 277 test scenarios, and 100% Coverage of test scenarios for manual testing and only 18% converted to automation testing. See the source code for API automation testing on [Github](#). This project use Postman for API manual testing, Serenity BDD, Rest Assured, Cucumber for API automation testing, Selenium and Cucumber for website Automation, and Java as programming language.
- **Alterra Academy Group Project** : Perform manual & Automation testing for API resources in Go Rest API. In a group of 2 persons we perform manual and automation testing . We cover the Users & Post resources and create a total of 34 test scenarios, and 100% Coverage for manual and automation and 100% of total scenarios are executed successfully. This project use Postman for manual testing, Serenity BDD, Rest Assured, Cucumber for automation testing, and Java as programming language. See the source code for api automation testing on [Github](#).

WORK EXPERIENCE

VISI PRIMA NUSANTARA

QA Staff

September 2023 - Now

Jakarta, Indonesia

- Creating Test Case – Menyusun dan mendokumentasikan test case secara detail berdasarkan requirement dan spesifikasi produk untuk memastikan seluruh skenario pengujian tercover.
- Execute Test Case / Testing – Melaksanakan pengujian manual sesuai test case yang telah dibuat, mencatat hasil pengujian, dan melaporkan bug atau issue yang ditemukan kepada tim terkait.
- Bug Reporting – Mendokumentasikan temuan bug secara jelas dan terstruktur di bug tracking system (Jira) beserta langkah reproduksi dan bukti pendukung.

- Create Automation Script For Web & Android – Mengembangkan script automation menggunakan framework selenium dengan python untuk Web & Appium dengan Java untuk Android untuk mempercepat proses regression testing pada platform web dan Android.
- Running Automation Script for Web & Android – Menjalankan dan memonitor eksekusi skrip otomatisasi untuk web dan Android, menganalisis hasilnya, serta memastikan kestabilan dan kualitas aplikasi.
